

Question ceramic cups

University Council meeting 26.01.2017

Even though the outsourcing of the Food&Drinks services has already been discussed in the University Council, we would like to take the opportunity to mention a current issue. If you buy a soup in one of the university restaurants, you can choose between eating your soup there from a ceramic bowl, or choose the takeaway option of a paper bowl. If you buy a coffee, however, you do not have this choice. Coffee can only be purchased in paper cups. From students, we heard that they would appreciate the option to buy coffee in ceramic cups, as coffee and tea from an actual cup does taste a lot nicer than from a paper cup. At the same time, it would also make the restaurants more sustainable.

In the process of outsourcing the Food&Drinks services ideas like this one can of course be implemented. Our question, however, is to already make this change in the meanwhile, until the Food&Drinks services are actually outsourced. Therefore, our question, would it be an option to have paper cups and ceramic cups in the university restaurants and can the CvB agree to look into the feasibility of this plan?
